ABSTRACT

There is a gap between Mexican legal education and Mexican legal practice. This gap has widened during the last few decades: while there have been significant social, economic, and political changes that have affected Mexican laws and legal institutions, most law schools continue to offer the same traditional courses and to use the same traditional teaching methods and materials.

Nevertheless, there have been some movements to reform Mexican legal education. Most of these movements focus on the modernization of the curriculum by redesigning the traditional courses and by offering new courses. This approach, however, concentrates only on what lawyers should know, and not on what lawyers should do to succeed in the current legal practice.

This deficiency in Mexican legal education could be overcome by incorporating into Mexican legal education the learning of legal skills, especially the problem-solving skill, using problem-based education as the learning method. Problem solving may be defined as the ability to incorporate legal and non-legal knowledge, different skills, and creativity to counsel a client or solve a specific and concrete situation. The emphasis of the learning method of this skill is on the process, not on the result.

This thesis has two parts. First, it analyses the Mexican legal education, its characteristics, challenges, and reform efforts, based on the analysis of empirical studies and relevant literature and on interviews with several deans of law schools and legal researchers. Second, it provides Mexican law schools and legal educators the basis to
develop skills-based courses, principally problem-solving courses, obtained from the analysis of relevant literature in the U.S. and complemented with interviews of Mexican scholars. This part analyses the problem-solving process, its components, benefits, curriculum-design principles, learning methods, learning material, and the obstacles for its introduction into Mexican legal education. Finally, the thesis offers examples of courses dealing with this skill, such as the lawyer as conflict solver, the lawyer as architect of business and transactions, the lawyer as community builder and basic lawyering skills.
# TABLE OF CONTENTS

## CHAPTER ONE: INTRODUCTION  

## CHAPTER TWO: MOVEMENTS OF LEGAL EDUCATION REFORM IN MEXICO  

### I. MOVEMENTS OF LEGAL EDUCATION REFORM IN LATIN AMERICA FROM THE 1950s TO THE 1970s  

A. General Context  
B. Movements of Legal Education Reform  
   1) Conferencias de Facultades Latinoamericanas de Derecho (Conferences of Latin American Law Schools)  
   2) Law and Development movement  
C. Results of these Movements  

### II. MOVEMENTS OF LEGAL EDUCATION REFORM IN MEXICO AFTER THE 1970s  

A. General Context  
B. Movements of Legal Education Reform  
   1) ANFADE and AFEIDAL: Coordinating reform efforts  
   2) ELD: Deepening legal knowledge  
   3) UNAM Law School: More flexible and specialized legal education  
   4) UIA Law School: Incorporating different teaching methods into legal education  
   5) ITAM Law School: Expanding and deepening legal analysis and reasoning  
   6) UP Law School: Complementing courses and teaching methods  
   7) CIDÉ Law School: Transforming traditional courses and teaching methods  
   8) Comparison of three law school curriculum  
C. Impact of these Reform Movements in Mexican Legal Education  
D. Conclusion
CHAPTER THREE: THE IMPORTANCE OF SKILLS-BASED EDUCATION IN LAW SCHOOLS

I. THE COMPETENT LAWYER

A. Purpose of Legal Education
B. Definition and Elements of a Competent Lawyer
   1) Knowledge
   2) Reasoning
   3) Skills
   4) Values
   5) Attitudes
   6) Experience
   7) Professional judgment
   8) Efficiency and success
C. Elements of a Competent Lawyer in Mexican Law Schools

II. SKILLS-BASED EDUCATION IN LAW SCHOOLS

A. Legal Skills
B. Skills-Training in Mexican Law Schools
C. Problem-Based Learning
D. Role of Professors in Skills-Based Education
E. Barriers to Skills-Based Education in Mexican Law Schools
   1) Financial problems
   2) Faculty training
   3) Meaningful material

CHAPTER FOUR: INTRODUCING THE PROBLEM-SOLVING SKILL INTO MEXICAN LEGAL EDUCATION

I. THE PROBLEM-SOLVING SKILL

A. Definition of Problem Solving and Its Essential Components
B. The Problem-Solving Process
   1) Analysis of the problem
   2) Development of options
   3) Decisionmaking
   4) Implementation of the decision
   5) Evaluation of the process
II. PROBLEM-SOLVING IN MEXICAN LAW SCHOOLS  

A. Problem Solving in Law Schools  
B. Problem Solving in Mexican Law Schools  

III. DESIGNING COURSES AND MATERIAL FOR DEVELOPING LEGAL PROBLEM-SOLVING SKILLS  

IV. SPECIFIC COURSES TO DEVELOP PROBLEM-SOLVING SKILLS IN MEXICAN LAW STUDENTS  

A. The Lawyer as Conflict Solver  
B. The Lawyer as Architect of Transactions and Organizations  
C. The Lawyer as Community Builder  
D. Basic Lawyering-Skills Course  

CONCLUSIONS
