Sticky WCIT:
Is This the End of the Internet?
An upcoming global UN conference will consider proposals that threaten Internet freedom – and Silicon Valley’s prosperity

Tuesday, November 27, 2012 at 12:45 pm

LOCATION:
Room 190, F.I.R. Hall Classroom Building, Crown Quadrangle

CO-HOSTED BY:
CALinnovates
Stanford Journal of International Law
Stanford Law and Technology Association (SLATA)

INTRODUCTION:
Mike Montgomery, Executive Director, CALinnovates

MODERATED BY:
Larry Downes, Author and Forbes Contributor

FEATURING:
Ambassador David Gross, former U.S. Coordinator for International Communications and Information Policy, U.S. Department of State
Patrick Ryan, Policy Counsel, Open Internet, Google, Inc.
A distinguished panel of experts

DETAILS:
In December, the World Conference on International Telecommunications (WCIT) will be held in Dubai to consider international rules governing the Internet. International entities are ready to take a run at imposing control over worldwide Internet services and infrastructure. Will allowing this overreach blunt the innovative freedom that has been central to the Internet industry’s evolution? Join us to learn more about policy implications on this issue and what the future holds for Internet freedom and Silicon Valley’s prosperity.
